

Hello math friends!

So the math in your packet is a review of material we have already learned this year. I do a big review at the end of the year, so this will really help with our end of year testing. In math right now we are learning about money, and then we will be learning about time. For online learning I will be focusing on these two concepts. If you have any questions, please message me on Bloomz or send me an email.

If you are feeling overwhelmed by the amount of information you are feeling, I would recommend the following format for math. We do an hour of math everyday, so I would recommend something like this (if you have access to devices allowing you to access the online learning):

15 Mins: Video lessons/games listed below

30 Mins: Imagine Math

15 Mins: Paper review packet

Thanks,
Ms. Salmond

<https://youtu.be/MbtmucV-U2c>

-Watch this fun video about money and review how much coins are worth. If you have real coins as examples you can have kids practice counting real coins. I would give them groups of different coins, and then have them figure out how much they are worth.

-Fun bingo game to practice money!

Thursday 3/19

<https://prezi.com/imdbfylzu8sk/2nd-grade-lesson-money/>

-For the journal they can just use paper. If you have real coins to use, that would be great (if not don't worry).
